

# Adding value to your compliance recording.

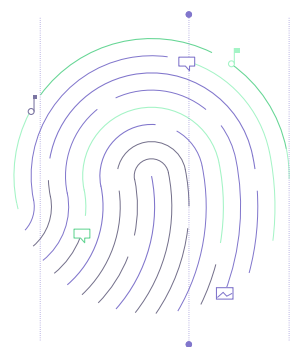

aircheck.

With so many benefits, you'll wonder how you ever managed without it. **deliver.media aircheck.** is an entirely cloud-based solution that automatically records, archives and analyses media streams. You can use it for compliance logging, metadata extraction and enrichment, speech-to-text generation, replay management, automated podcasting, monitoring of competitors' services, and much more.

Through the use of live audio fingerprinting, **aircheck.** automatically identifies and aggregates artist and song metadata, including ISRC recognition. Its automated speech-to-text service operates in a range of languages, including English, French, Dutch, German and Swiss German.

**aircheck.** can be applied to any linear or nonlinear media channel and supports both audio and video streams. A web-based interface enables simple timeline browsing and sharing of selections. Time markers can be stored to help define and locate key sections.

## Reference: Eurovision Sport

EBU Eurovision Sport used **aircheck.** during UEFA EURO2020 and UEFA Champions League, recording all EBU member stations reporting on the event and extracting audio bits of joy and emotions then shared all across Europe.

Combined with sports metadata, **aircheck.** enables EBU producers to listen to multiple stations simultaneously and quickly extract commentary reactions from all the member stations.

**EUROVISION  
SPORT**

OPERATED BY EBU

## Reference: WDR - Sportschau

Producing a short audio summary for each of the 612 Bundesliga and 2. Bundesliga games is challenging, especially because multiple games are happening simultaneously.

This is why WDR is using **aircheck.** Their producers can quickly sift through all the commentary and game actions while the games are still ongoing, making it easy to collect all the necessary audio pieces for a great summary.
